

About Us...

STEM on the Go is an enrichment program that offers unique hands-on experiences that challenge students from all cultural and economic backgrounds to think critically and creatively while exploring areas such as environmental conservatism, health awareness, and structural engineering.

Our Mission...

STEM on the Go strives to expose students to fun and engaging standards-based science lessons that promote curiosity, confidence, and problem-solving skills.

Our Vision...

STEM on the Go envisions a future of STEM related careers that reflect an equitable balance of gender and racial diversity.
